

istitutomarangoni

**THREE YEAR COURSE
INTERIOR DESIGN**

AFAM Validated

Brief descriptive summary

Over the past 80 years Istituto Marangoni has grown and developed alongside the thriving Italian fashion and design industry. Through an exciting curriculum aimed to develop practical, creative, and business and management skills which are subject specific, and relevant to the international fashion industry, Istituto Marangoni undergraduate courses prepare students with the necessary knowledge and know-how in order to enter a professional career in the fields of Fashion Design, Accessories and Footwear Design, Fashion Styling, Fashion Business and Communication, Multimedia Arts, Interior Design, Product Design, Visual Design, Art History and Culture.

Students will initially acquire basic skills, advancing over the 3 years into independent learners, ready for a career in their chosen profession.

General Information

1. Certificate / Diploma awarded

Diploma Accademico di I Livello, recognised by the Italian Ministry of Education as an academic diploma equivalent to a university undergraduate level degree, participants will obtain 180 CFA (crediti formativi accademici) equivalent to 180 ECTS credits. The pathway held in Milano 'Interior Design & Lighting Pathway' is a specialisation of the recognised AFAM main course 'Interior Design', (Pathway final diplomas will state the main course title).

2. Course description

The three-year Interior Design learning programme envisages various teaching and learning methods, including seminars, tours, presentations, workshops, library and material archive sessions, lessons held in the laboratory, projects carried out individually and in groups and individual research.

The first year of studies will provide students with a series of tools that are essential for building the foundations required to prepare them for the rest of the course. They will acquire the ability to analyse the space of the design in relation to the human figure and interpret its constructive technical aspects with new ideas, supported by the development of models in the workshop. The design elements will be represented with the software AutoCAD and Digital lessons will enable them to present their technical deliverables typeset professionally. The basic lessons of freehand drawing provided will help them to represent the prospective construction of the interpreted spaces. They will also be introduced to the materials and processes used in interior design. The lectures in History of Art and History of Design will provide the essential cultural support required in order to understand the evolution of the living space.

By the end of the academic year, students can choose to follow a specialised course focusing on interior lighting design or continue with a general course.

In the second year, the students will be capable of expressing their creativity by tackling various types of designs for interiors, interpreting the customers' requirements with ideas in line with the international trends. They will learn to choose covering materials and furnishing fabrics, they will study the theme of design and lighting, producing technical representations of the design layout. The three-dimensional construction of the spaces designed with dedicated software programs will illustrate the defined style of the interiors, presented with an approach that is not only technical but also based on emotions, for the structure of the detailed story of a concept, from its inspiration to its final representation. The cultural subjects will support the contemporary element of Design.

In the third year, students will consider the fashion industry, analysing the identity of fashion brands and interpreting their stylistic codes in retail spaces, and studying the marketing aspect of the sector in order to understand the luxury market and the market positions of the brands. They will interact with the customer or company in an interior design project and produce an individual creative and innovative design that conveys the experience acquired during the three-year course. The students will perfect their renderings in order to produce a realistic photo mock-up of the designed spaces and will acquire the skills required to present the technical and executive drawings required of designers. By the end of the course, they will have created a professional portfolio comprising the highlights of the designs developed during the course.

Course Information

3. Educational Aims

School Education Aims:

- to develop flexible approaches to programme delivery and student support which reflect the needs and expectations of our students;
- to provide a supportive and inclusive learning environment which will enable success for all learners;
- to encourage the development of students' intellectual and imaginative powers, creativity, independence, critical self-awareness, imagination and skills that will enhance global employment opportunities on graduation in all programmes;
- to establish a culture of constant improvement in learning, teaching and assessment that is anticipatory, enabling, supportive, rewarding and fully aligned with the Institutions vision and strategic objectives;

- to provide a learning experience that is informed by research, scholarship, reflective practice and engagement with fashion and design industry and the professions.

4. Course Learning Outcomes

Educational Outcomes:

On successful completion of their course of study students will be able to:

- apply skills of critical analysis to real world situations within a defined range of contexts;
- express ideas effectively and communicate information appropriately and accurately using a range of media including ICT;
- manage their professional development reflecting on progress and taking appropriate action.

Final Award Learning Outcomes:

At the end of the three-year course in Interior Design, the student will be capable of:

- managing a detailed system where the design of the spaces, lighting, materials, colours and furnishings interact;
- demonstrating basic skill in the use of ITC technologies and technologies associated with the presentation of designs;
- reinterpreting the distribution of the spaces in an assigned design;
- providing technical representations of the design layouts and furniture, developing an interior design on several levels;
- interpreting the style and philosophy of international fashion brands and translating them into the sales area of the luxury market;
- managing the design of the retail space, in terms of how the areas are distributed, the pathways followed by the customers, the display system and layout;
- proposing innovative architectural solutions in line with the contemporary trends, in designs to be offered to customers and presenting them professionally;
- developing a professional portfolio comprising the highlights of the designs produced during the course.

5. Course structure

Year 1

Code	Subject Title	Credits CFA (ECTS)
ISDR/02	Representation Methods and Tools	4
ISSC/01	Design History and Culture	3
ISDC/07	Information Technology Fundamentals	1
ISDR/02	Technical Drawing	4
ISME/02	Colour Design	2
ISME/01	Design Methods	8
ISST/01	Physics for Design	2
ISSC/01	History of Applied Arts	3
ISDR/02	Introduction to Design Information Technology	4
ISME/02	Light Design	4
ISME/03	Perception Science and Languages	4
ISME/01	Introduction to Design Methodology	4
ISST/03	Materials and Processes	2
	Foreign Language	4
	Free Study Activities	4
	TOTAL	60

Year 2

Code	Subject Title	Credits CFA (ECTS)
ISSC/01	History and Criticism of Contemporary Design	3
ISSU/04	Product Ergonomics	3
ISDR/03	Techniques of Design Communication	4
ISDE/02	Interior Design	8
ISDC/04	Multimedia Planning	4
ISME/01	Introduction to Design Methodology	4
ISSC/01	History and Criticism of Contemporary Design	3
ISSU/03	Psychology for Design and Communication	4
ISDE/02	Computer Aided Design (CAD)	8
ISDE/02	Interior Design	8
ISME/01	Design Education	4
ISST/03	Materials and Processes	2
	Free Study Activities	4
	TOTAL	60

Year 3

Code	Subject Title	Credits CFA (ECTS)
ISSC/01	Design History and Culture	3
ISDR/03	Rendering	4
ISDE/02	Environment Design	8
ISST/03	Production Technologies	4
ISSE/03	Fashion Product Development: from Conception to Consumer	4
ISDR/03	Rendering	4
ISDE/02	Furniture	6
ISDC/04	Multimedia Planning	3
ISSE/02	Organization Skills and Enterprise Performance Management	4
ISDC/08	Fashion Project Communication	3
	R&D internship	9
	Dissertation	8
	TOTAL	60

6. Learning and Assessment Strategy
Programme methods:

The programme will present students with a variety of approaches to learning and assessment strategies that will promote intellectual, imaginative, analytical and critical judgement.

It will allow students to develop understanding as well as their presentation and communication skills, which they will be able to demonstrate in a variety of forms.

A combination of different learning and teaching methodologies are employed in order to promote reflective learning and develop generic transferable skills.

Methods include:

- projects to encourage independent learning through investigation, enquiry and problem solving;
- group project to enhance interpersonal and collaborative skills;
- tutorials and group tutorials to facilitate shared experiences and best practice;
- seminars, formal lectures and workshops;
- study, trips, external projects and competitions present students with another dimension to their learning experience;
- guest speakers provide students with a full, broader and real perspective to their specialist field of study.

Assessment methods to support learning

The programme uses a balanced assessment system, both summative and formative as an integral part of gathering information on student learning. Various forms of assessment are used to test different types of skills and learning.

Formative Assessment:

Formative assessment informs both teachers and students about student understanding at a point when timely adjustments can be made. In formative assessment students could be involved in the assessment process. These formative assessment situations will also give students an opportunity to learn to critique the work of others. Some of the instructional strategies that will be used formatively include the following:

- criteria and goal setting: asking students to participate in establishing what should be included in criteria for success;
- self and peer assessment: With peer evaluation, students see each other as resources for understanding and checking for quality work against previously established criteria;
- student record keeping helps students better understand their own learning curve. This process not only engages students, it also helps them see the progress they are making toward the learning goal.

Summative Assessment:

These assessments are a means of evaluating student learning, at a particular point in time, relative to established marking criteria. Summative assessments can occur during, as well as at the end of each subject - concentrating on specific evidence of student work, examples as follows:

- Portfolio Assessment is used to assess a variety of projects that have been developed throughout the subject;
- Practical Coursework allows students to demonstrate their understanding and application of practical areas of study;
- Written Reports are required in some study areas, where a clear and structured brief is provided;
- Formal Examinations;
- Presentations may also be used to allow the student to develop their professional communication and presentation skills.

Attendance:

The exams are processes designed to verify the learning outcomes and the knowledge acquired by the students within the single courses.

To gain admission to the exams, students must have attended at least 80% of the hours of lessons scheduled in the study plan for each course. The attendance is verified by the teachers of the individual courses, who will only admit the students who have complied with this requirement to the exams. Should the student fail to reach the required attendance level in one or more courses, they must attend said courses again before they will be allowed to sit the exam and be admitted to the next Academic Year.

Grades:

The exams are graded by assigning them marks out of thirty. The minimum mark is 18; The Board can also decide to award an additional merit to students who obtain the maximum mark of 30/30 in the form of the mention "Cum Laude".

Full details on attendance and assessment are explained in the Student handbook (Manifesto dello Studente).

7. Career service

The purpose of the Istituto Marangoni Career service is to bridge the gap between course completion and entering the world of work. Monitoring, guidance and counselling activities are organised throughout the academic year. The careers service organises various activities including seminars and round table discussions with fashion professionals, HR managers and head-hunter agencies on specific topics such as future career paths, personal research methods and job profiles. Individual meetings are also arranged to assist with CV preparation, revise portfolios and encourage students to talk about their career goals and expectations.

Additionally, the Academic Board, by way of a specially appointed committee, will evaluate the contents and commitment in terms of time invested in the traineeship for the purposes of assigning credits. The above-mentioned committee will be responsible for assessing the results, having indicated the methods for doing so to the student before the traineeship commences.

When assessing the traineeship, the committee will be assisted by the teacher who has acted as the student's tutor during the traineeship or apprenticeship activities.

The traineeship activity is regulated by a specific convention that indicates: duration of the traineeship, place where the activities are performed, any payment or reimbursement of expenses, insurance covers, the name of the tutor, indicated by the student and appointed by the Director based on the indications provided by the Academic Board, and the name of the company tutor. The learning activities performed by the students at other institutes in Italy, Europe or other countries, which are fruit of activated agreements, will be recognised. The results achieved are evaluated either by the Exam Board, considering the correspondence of the learning activities performed, or by a specific committee appointed by the Academic Board.

8. Course Specific Admission Requirements

To apply, the following documents are required:

- Copy of high school diploma or equivalent
- Signed personal statement (motivational letter)
- Successful completion of entry test*

*Entry Test (Undergraduate courses)

- Entry Test for design related courses: Students are asked to provide 6 drawings they would consider as their personal statement on fashion, art or design in relation to their chosen subject, plus a short skills test consisting of 4 multiple-choice questions on the subject of fashion, and design.

- Entry Test for business related courses: a short skills test consisting of 10 multiple-choice questions.

an aptitude interview: candidates are required to take an aptitude interview either via Skype or face to face.

9. Student Support Strategy

Student Support Officers

A dedicated Student Support Officer is available for all students on the programme.

For academic counselling, Student Support Officers will liaise with tutors and programme leaders to offer practical advice to resolve specific academic difficulties.

A written record of these tutorials will be kept in the student's file for reference and to assist in the monitoring of student progress.

For matters of pastoral care the Student Support Officers will help in:

- finding their way around;
- managing their time;
- dealing with stress;
- getting the best from their course;
- understanding and applying the school's rules;
- anything else the officers can advise on.

One-to-one appointments may be made by phone, in person (by contacting reception) or by email. Where possible students can expect to be seen almost immediately, or contacted to arrange a suitable time.

10. Student Evaluation

Student feedback is essential to the programme development and student comments are used to enhance both the successful management of the programme and the teaching/learning strategies.

Istituto Marangoni gathers student opinion in a variety of ways, which may include the following:

- informal contact with Programme Leader and subject Tutor, and through appointments with academic staff;
 - end of Course Evaluation;
 - end of academic year online questionnaires where students will be invited to reflect on their overall experience in their school.
- Istituto Marangoni would prefer that on most occasions students be identified when giving constructive feedback on the course and teaching methods. There might be occasions when it is not appropriate and Istituto Marangoni recognizes this exception. In these instances, programme teams and central support services will ensure that anonymity and confidentiality is respected.
